

Oticon Radio Model - Quick Installation Guide

Radio Model Name: RITE 4

The RITE 4 radio model is a low power, inductive radio transceiver working at 3.84 MHz consisting of an RF Engine Block (incl. DSP, radio & memory), antenna coil, motherboard (incl. small passive components) and intended to be installed as a module into Oticon wireless hearing aid devices only. The module also has all voltage regulators included inside the engine block. The module requires a battery, one or two microphones on a flex PCB and a speaker to be attached and must be mounted in an external plastic shell. It is possible for authorized personnel only to program the module through a flex I/O. The module is depicted below:
